RE: Periodical Subscriptions

We write to communicate an untenable situation facing the Harvard Library. Many large journal publishers have made the scholarly communication environment fiscally unsustainable and academically restrictive. This situation is exacerbated by efforts of certain publishers (called “providers”) to acquire, bundle, and increase the pricing on journals.

Harvard's annual cost for journals from these providers now approaches $3.75M. In 2010, the comparable amount accounted for more than 20% of all periodical subscription costs and just under 10% of all collection costs for everything the Library acquires. Some journals cost as much as $40,000 per year, others in the tens of thousands. Prices for online content from two providers have increased by about 145% over the past six years, which far exceeds not only the consumer price index, but also the higher education and the library price indices. These journals therefore claim an ever-increasing share of our overall collection budget. Even though scholarly output continues to grow and publishing can be expensive, profit margins of 35% and more suggest that the prices we must pay do not solely result from an increasing supply of new articles.

The Library has never received anything close to full reimbursement for these expenditures from overhead collected by the University on grant and research funds.

Research Data Services

Effectively managing your research data can increase the pace of the research process, contribute to the soundness of research results, help meet funder requirements, and make research easy to share and discover. Contact us at researchdata@uconn.edu for help.

EDUCATION
Guidance throughout the data lifecycle either individually or at one of our workshops.

CONSULTING
Assistance with data management plans, funding sources, or repository options.

ARCHIVING
Recommendations on an appropriate data repository for your data.
What’s next?

When it comes to the future, there are three kinds of people: those who let it happen, those who make it happen, and those who wonder what happened.
